

SMART SAFETY BATTERY ENERGY STORAGE SOLUTIONS

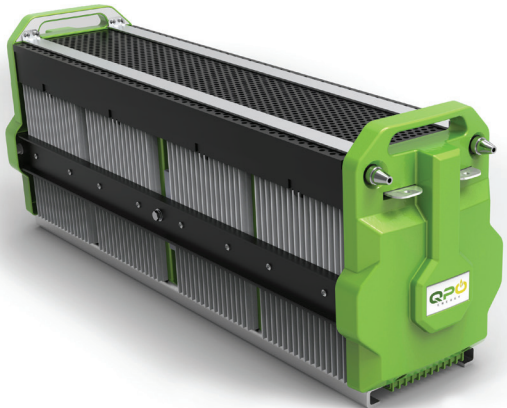

With Enhanced Fire Safety
& Security Features

Patent Pending

Residential, Land/Water vehicles,
ATV, etc.

Industrial and Commercial

Stopping the spread – Our unique battery rack design for the battery modules can prevent the spread of a battery cell fire to adjacent batteries.

Fire Prevention – Our innovation is a low-cost, highly reliable lithium-ion battery system with several enhanced fire safety features that continually monitor every battery cell for swelling or internal pressure changes.

Industry Setting Standard – Our new battery technology can prevent battery fire that the current state-of-the-art industry cannot.

Our goal is to provide insurance coverage for every Energy Storage Solution we sell.
